The harmless-looking white powder you're looking at could have been a death sentence for Bob — and a catastrophe for his grieving family. Just hours ago, it was arterial plaque, clogging his circulatory system, restricting blood flow to vital organs, and setting the stage for heart and brain problems.

Left alone, it had the power to turn Bob — a living, breathing human being — into a fading memory — a mere statistic: One of the 960,000 Americans who will be killed by a clogged circulatory system this year.

Who knows? Bob might have been one of the fortunate ones and survived. This plaque might just have triggered a mild heart or brain problem, leaving him paralyzed or with diminished mental powers, but still alive.

Or, if he was really lucky, he might have escaped with a diagnosis of high blood pressure — and a lifetime sentence of drugs that may cause skin rashes, insomnia, depression, kidney damage and even rob him of his sexuality.

But now, this once-savage killer is as harmless as a teaspoon of sugar. Because a few hours ago, just as he does every day, Bob swallowed two, tiny capsules containing an amino acid so safe, that the United States Food and Drug Administration has approved it as an additive to baby food.

Within hours it entered his bloodstream, seeking out, arresting and neutralizing the rogue calcium deposits that had super-

glued this plaque to his artery walls.

Then, in an act of supreme irony, the very blood that this plaque had once blocked quickly swept it to his kidneys where it was unceremoniously evicted from Bob's body as a component of urine.

Because, you see, over a period of several months this remarkable amino acid did not just help remove plaque from Bob's cardiac arteries. It helped scrub every one of the 75,000 miles of arteries, veins, capillaries, and microscopic arterioles in his body.

Now, nutrient-rich, life-giving blood is coursing to places it hasn't reached in years — or even in decades.

And suddenly, cells that were once starved and dying throughout his body are being reborn.

**There will be side effects.
Truly amazing ones!**

Just like this happened for Bob it can happen for you. Plaque can be dissolved throughout your entire circulatory system. Life-giving blood, vital nutrients, hormones, oxygen and other substances once again can reach every cell in your body.

Your body has everything it needs to begin healing and return you to optimal performance.

That's why so many users say that over time, their youthful energy levels are restored... shortness of breath has become a dim memory... tingling in arms and legs has vanished, replaced by the intense sensations and more precise motor control of their youth... and why many patients who could not walk due to muscle pain or angina pain have reported that they can walk without pain after chelation therapy.

It's also why, with [Good Life Labs Release Artery Health Formula](#), you'll probably find, given time, that your vision improves... joint stiffness and inflammation are reduced... your brain is rejuvenated, mental fog lifts... your memory is sharpened and your ability to learn returns... and even sexual pleasure and performance is renewed!

The brain cells that control learning, reasoning, coordination, and memory are being rejuvenated and sparking to life again...

Nerve endings, once deadened, are being revived and electrified. Creaky, inflamed, and painful joints are being soothed, renewed, and rendered pain-free...

Entire organs - from eyes and ears... to heart, lungs and liver... to stomach, pancreas, and intestines - and even sexual organs - are being revitalized and are returning to their normal functions...

Extremities - arms and hands, legs and feet - once cold, tingling and numb are now being warmed and sensitized by abundant supplies of life-giving blood...

Skin that was thinning and weakening with each passing year is regaining the smoothness, elasticity and youthful glow it had 10, 20, even 30 years ago...

And the patient's body rallies, even the fatigue that began plaguing him after age 50 is giving way; replaced by deep reservoirs of vibrant new energy.

And suddenly, cells that were once starved and dying throughout the body are being reborn.

...So what is this miracle of nature?

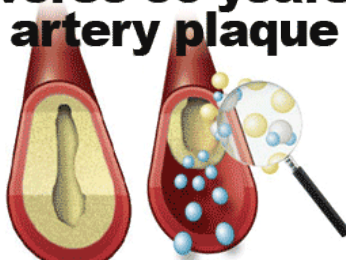

...this 50-cent capsule that works the wonders that the world's most expensive prescription drugs can't?

**Four little letters
are saving Bob 's life.
They should be saving yours.**

Scientists call it "ethylenediaminetetraacetic acid." But please don't be put off by the fancy jargon. The rest of us refer to it with four little letters: "EDTA".

EDTA, first synthesized in Germany in 1935, is a simple amino acid, very similar in composition to common household vinegar.

**Reverse 50 years
of artery plaque**

**Arteries Go
From This...To This!**

**A healthier circulatory system
is the secret to a healthier body.**

As millions of Americans and others around the world continue to use Chelation Therapy to remove toxic metals from their bodies and deadly plaque from their circulatory systems, something else is happening - something truly miraculous.

As toxins are removed... as circulatory systems are scrubbed clean... and as abundant supplies of life-giving blood begin surging throughout their bodies...

both patients and doctors report that scores of dangerous, chronic, painful, and even deadly health problems simply vanish:

Blockages in the arteries feeding the heart and brain may be dramatically reduced and even eliminated...

High cholesterol and high blood pressure - key risk factors for heart and brain problems - may be reduced to normal levels...

Irregular heart-beats and palpitations can be reduced or eliminated...

Angina and general chest pains may be eased...

Edema (swelling of the lower legs and ankles) - a symptom of congestive heart problems - can be alleviated...

Chronic shortness of breath may be eased or eliminated...

Cold, numb, and painful extremities can be warmed and soothed...

Paralysis due to heavy metals toxicity can be improved...

Infections due to a failing immune system may be less frequent or eliminated...

Enlarged prostates can shrink...

Varicose veins can fade or even vanish...

Insomnia can be replaced by deep, restful sleep...

Low energy may be replaced by deep wells of new energy...

Vision problems and “floaters” often melt away, eyesight may improve...

Male impotence can be reversed...

Sciatica and excruciating back pain may be relieved...

Sexual sensation can intensify in both men and women...

Hearing loss due to calcium deposits in the ear can improve ...

Age-related cognitive decline, memory loss, and fading mental powers can be halted or reversed...

Skin problems and ulcers can be erased...

And much, much more!

**Remarkable scientific breakthrough:
The astonishing power
of chelation therapy
is now in your hands!**

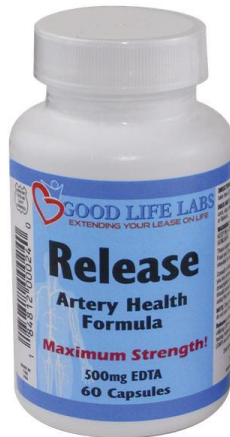

Until relatively recently, getting the full benefits of chelation therapy was uncomfortable, time consuming and expensive.

You had to take time out of your busy day... drive to the nearest chelation clinic... plop down into a chair... get poked with an I.V. needle... and sit there for up to three long hours while the EDTA was pumped into you.

When it was over, the nurse would hand you a bill for up to \$500 — and then tell you that you still had nine more treatments... 27 more hours in the chair... and another \$4,500-worth of treatments to go.

And as if the \$5,000 bill for your first set of treatments wasn't enough to break you, you discovered that you needed to come back in six months for another six treatments, another 18 hours in the chair and another \$3,000 invoice!

The high price and inconvenience of chelation therapy put it out of reach for many Americans. But now, those days are gone for good, thanks to [**Good Life Labs Release Artery Health Formula - Maximum Strength with 500mg EDTA.**](#)
